

artos C60 end post

C60 end post

With its large cross section and surface area contact with the ground, the artos C60 end post is an excellent choice for your trellis.

The standard version has 14 pairs of hooks, spaced at a distance 100mm, 7 holes on the rear of the post every 200mm, ensuring a wide range of attachment options. The external hooks make the use of chains very easy.

C-Post hook
